BUILDINGS & STRUCTURES

The Creamer Companies are leaders in many types of construction — buildings and structures are no exception. Our building expertise is an integral service in the ever-expanding Creamer Companies portfolio. Whether a stand-alone structure or a part of a larger project, we have the experience and capability to meet your construction needs.

Our buildings and structures capabilities include, but are not limited to:

- Parking garages, train stations and masonry structures
- Pump stations and generator buildings
- Warehouses, commercial buildings and transfer stations
- Retaining walls, toll plazas and site improvements

J. Fletcher Creamer & Son, Inc. self-performs almost all aspects of this work from footing installation to final site improvements. We have completed numerous design-build projects for both public and private clients and have received many awards for our work.

Whether your needs are a small slab-on-grade building or a complex pile supported structure, we have the most dedicated and skilled project teams available to safely and effectively get the job done.

For more information about our buildings and structures, visit our web site at: www.jfcson.com
