CORE VALUES

In accomplishing our Vision, the men and women that make up The Creamer Companies are committed to maintaining our Core Values of:

SAFETY

The protection of our employees and the public

QUALITY

Our employees will perform quality work

RELIABILITY

Our customers can depend on our employees to respond to their needs

INTEGRITY

Our employees will always do the right thing

PRODUCTIVITY

Our employees will produce the greatest amount of work in the least amount of time that safety will allow

RENEWABLE ENERGY

The Creamer Companies have entered the challenging and exciting renewable energy market with the goal of not only enhancing our portfolio of disciplines, but with the mindset of constructing affordable alternative energy solutions. We are participants in the worldwide initiative to save the earth.

The transportation of energy is as important a commodity as the generation of power.

We at Creamer are going beyond wind and solar and other renewables and are involved with the transportation of energy through the construction of substations and towers. We are expanding our capacity in renewables while growing our already strong presence in energy transmission.

Our crews install the foundations and support structures for wind and solar projects; construct all the renewable energy site work including conduit installation; install the transmission lines. We provide design/build services as required.

Our extensive fleet of modern and specialized equipment enables us to perform many types of jobs, including:

- Drill caissons
- Drive piles
- Erect turbines
- Install ground mount and roof top solar panels
- Directional drilling
- Site grading

Let us assist you in your quest for economical and clean renewable energy. Contact us today – visit our website at: www.jfcson.com
